

# Introducing a New Concept in Electrical Junction Box Design.

*Two identical halves clip together over a new or existing electrical wire connection to form a compliant junction box, without having to disconnect and reconnect the wires.*

**Your connection 100% compliant ... In a click!**

## Application

Designed & manufactured in South Africa to create an industry compliant electrical junction box. Comes as a complete unit with no added extras to purchase.

Provides protection from dirt, dust and moisture.

Once closed, a twist of a screwdriver is required to reopen the unit for added safety

## Specification

**Outer Material:** Natural Polypropylene Random Co-polymer. Robust construction and non-toxic.

### **Inlet Cable-Grab Pads:**

Ensoft SL. Designed to shape around cable for snug fit.

**Colour:** Transparent top for quick inspection with Opaque white bottom.

## Packaging

10 units per plastic bag, packed in cardboard boxes of 25 bags per box (250 units per box)

## Delivery

Delivery date to be confirmed with each order placed. Cape Town area, delivery free. All others will be subject to quotation.
